

DKT bag with die cut reinforcement

- with bottom gusset

The DKT carrier bag with die cut and reinforcement sheet glued or welded on the inside is white or transparent as the basic colour.

but can also be coloured according to the schoolman's wishes. You have a wide choice of materials, e.g. HDPE, LDPE, MDPE, COEX as well as recycled film (Blue Angel) and organic film made from wheat or sugar cane, the usable film thickness ranges from 20 - 120 μ .

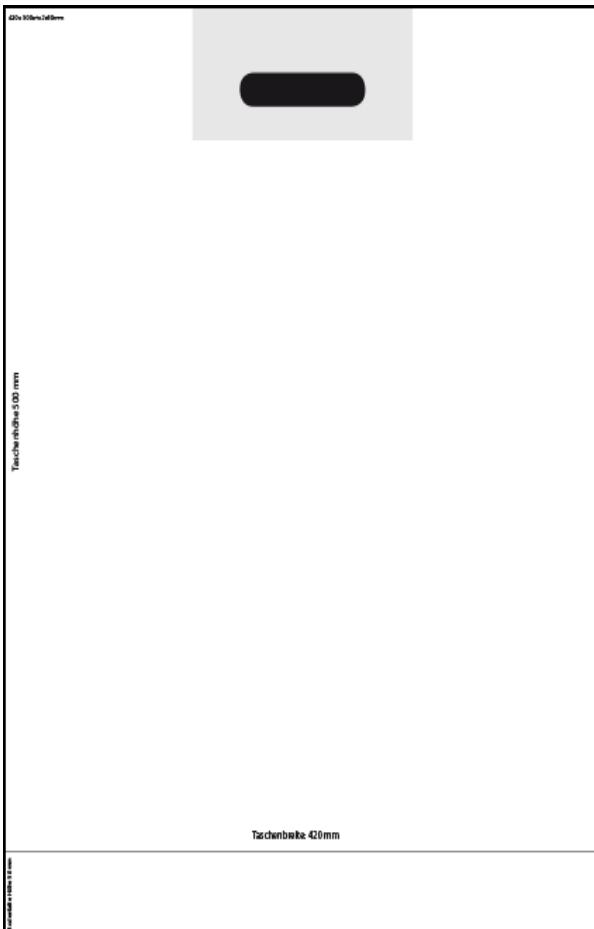

The carrier bags can be extruded in different thicknesses and have a reinforcing sheet, which increases the carrying capacity of the bag.

The handle hole is punched out or on and is parallel and kidney-shaped.

The bags are printed in flexographic printing with up to 10 colours and can also be produced full-surface or with dropped edges, depending on the design.

The printing inks Euroscale, HKS, Pantone are used on water or alcohol basis, are of course food safe and without heavy metals or harmful substances.
