

Die cut bags

Variations:

- with side gusset
- with turn on top
- with bottom gusset

Our LD/HD PE carrier bags with punched-out handle hole are white or transparent as standard, but can also be coloured according to Schulmann on request. You also have a wide range of materials, e.g. HDPE, LDPE, MDPE, COEX as well as recycled film (Blue Angel) and organic film made from wheat, or sugar cane.

The carrier bags can be extruded in different thicknesses and have a bottom gusset or a side gusset, which increases the volume of the bag.

A fold-over in the handle area increases the carrying capacity of the bag without a reinforcement sheet.

The handle hole is punched out or on, without reinforcement, parallel and kidney-shaped.

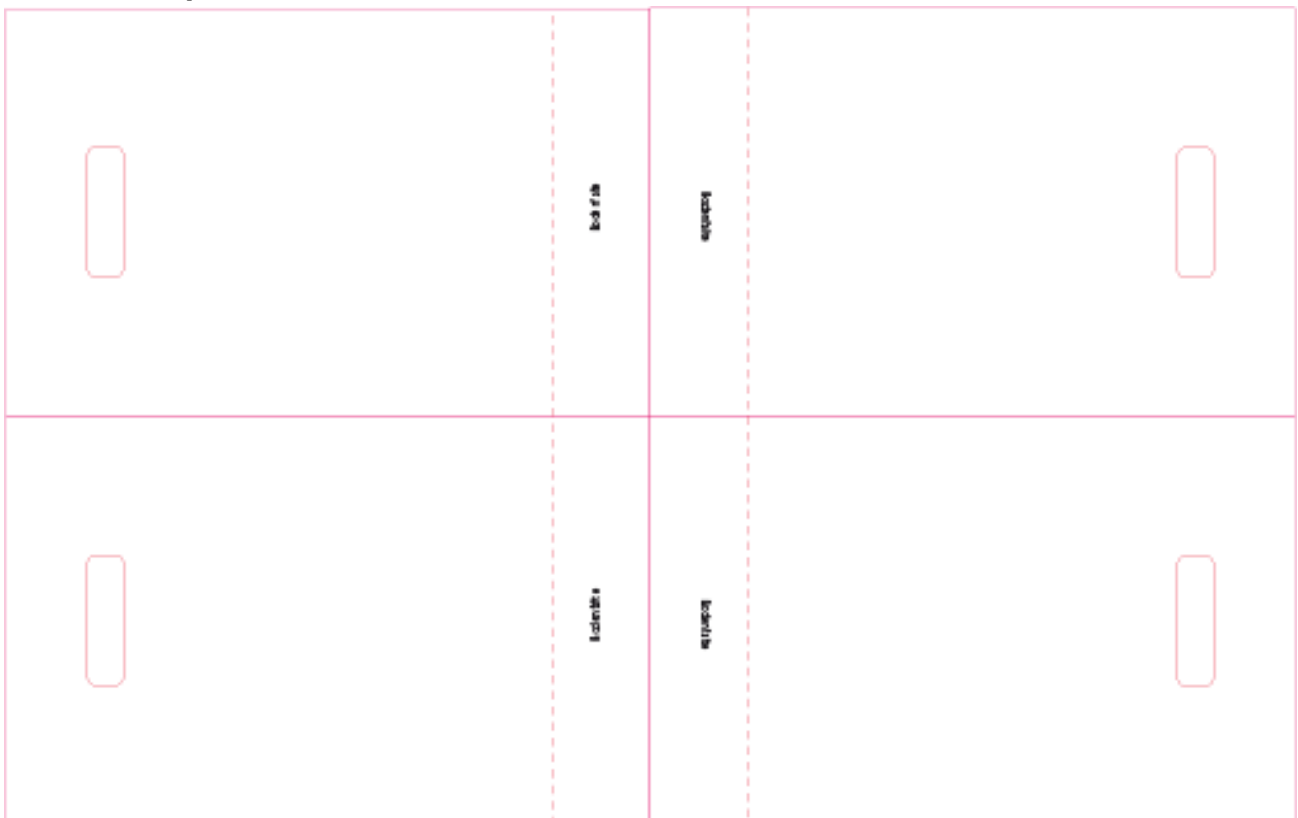

The bags are printed in flexo and, depending on the version, can also be produced can also be produced with a full surface or with a dropped edge.

The printing inks Euroscale, HKS, Pantone are used on a water or alcohol basis, are of course food safe and without heavy metals or harmful substances.

Another way of processing the bags is the finishing as rolled, perforated or blocked bag, of course we can also deliver the bags as tear-off bags or in dispenser boxes.
