

Flat handle paper bag

The alternative to the plastic bag. Since the discussion about avoiding plastic waste in the world's oceans, a boom has flared up around the paper carrier bag. The flat handle variant is a machine-produced carrier bag that is available in various standard formats.

Almost all discounters and full-range stores have now replaced plastic bags with paper carrier bags.

Flat handle carrier bags are characterised by:

- Kraft paper white or brown from 70 gr. to 120 gr. thickness
- Also made of recycled or FSC® paper
- 5-fold flat handles, glued on the inside or outside, or gladly with grip hole
- Formats from 18 - 54 cm width and 22 - 50 cm height
- Print: Flexo printing up to 8 colours

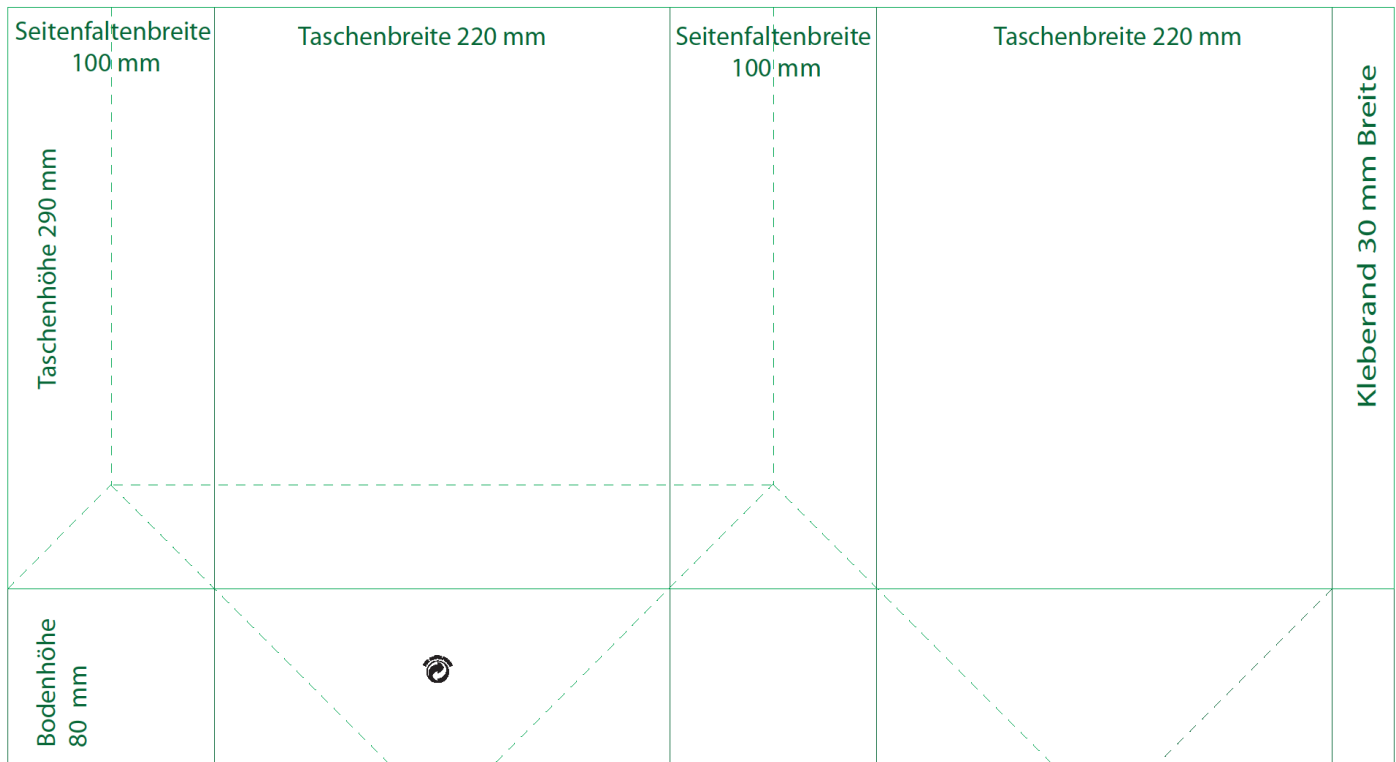

Advantages for paper:

- Decomposes completely and decays
- Renewable raw material

Disadvantages for paper:

- Stability decreases with moisture / rain
- Storage volume 3 x as high as with film
