

## Loop handle bags

### Varianten:

- with turn on top

The loop carrier bag is the classic supermarket carrier bag for heavy shopping. Its basic colour is white or transparent, but it can also be coloured according to Schulmann on request.

A wide range of materials is available, e.g. HDPE, LDPE, MDPE, COEX, mixed films as well as recycled film (Blue Angel) and bio-film made from wheat or sugar cane, whose usable film thickness ranges from 20 - 120  $\mu$ .

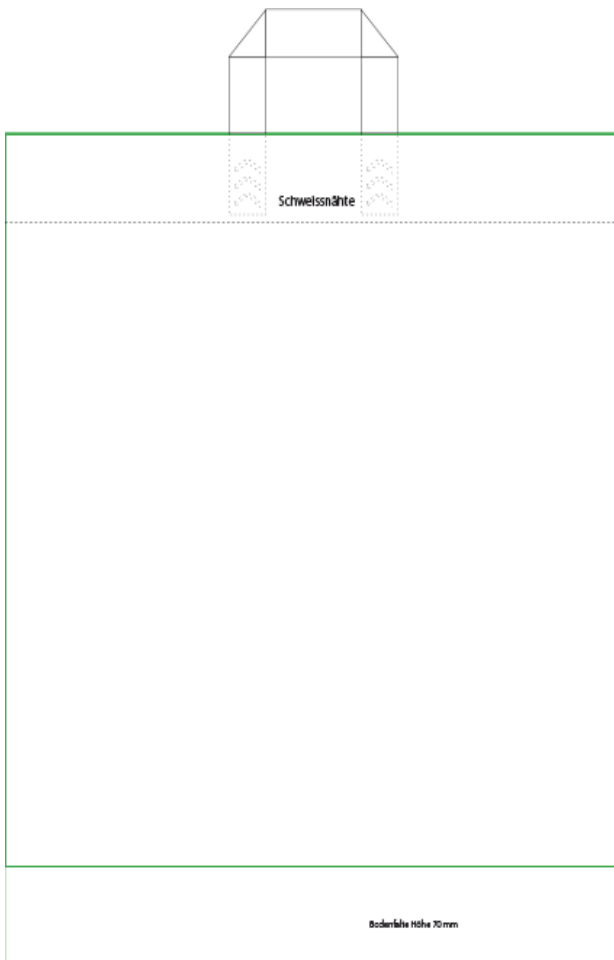

The carrier bags can be extruded in various thicknesses and have a carrier loop that is welded to the bag at the upper end.

Below 50  $\mu$ , it is recommended to provide the loop carrier bag with a cover in order to achieve a higher carrying capacity.

The bags are printed in flexographic printing with up to 10 colours and can also be produced full-surface or with dropped edges, depending on the design.

The printing inks Euroscale, HKS, Pantone are used on water or alcohol basis, are of course food safe and without heavy metals or harmful substances.

### Artwork sample

We would also be happy to advise you personally and give you creative ideas or technical information. Just call me on +49 (0) 8035 983-0. We are very much looking forward to a joint project.
