

## T-Shirt bags

Our T-shirt bags made of LD PE or HD PE are white or transparent as standard. For the shirt bags, you have the option of increasing the value of the bags by colouring them according to Schulmann. The available materials range from HDPE, LDPE, MDPE, COEX to recycled film (Blue Angel) and organic film made from wheat or sugar cane. The T-shirt bags can be extruded in various thicknesses and have a side gusset.

Due to its great depth, which is mostly in the gussets, it saves space and still has a large volume.

The bags are printed in flexographic printing with up to 8 colours and, depending on the design, can also be printed up to 90 %, depending on the design.

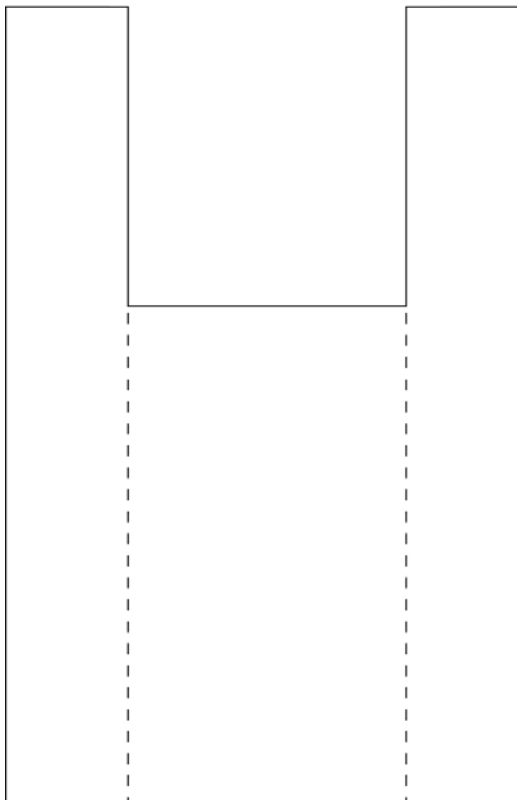

The printing inks Euroscale, HKS, Pantone are used on water or alcohol basis, are of course food safe and without heavy metals or harmful substances.

Another processing method of the bags is the finishing as rolled, perforated or blocked bag with special perforations for a hanging.
